

BRI-TEK TECHNOLOGIES ENVIRONMENTAL POLICY

It is the policy of Bri-Tek Technologies Limited that we will continuously work towards improving our effect upon the environment in any way we can, providing it is reasonably practicable for us to do so.

We will monitor our environmental performance with focus on energy efficiency, waste minimisation, disposal and recycling. Where we cannot eliminate an issue, which is beyond our reasonable control, we will aim to mitigate issues.

The company will always comply with applicable legal requirements and with other requirements to which we subscribe which relate to our environmental aspects.

We will review our products and systems and their environmental impact at the planning stage as well as during an ongoing process and annual review. The review will cover training, legal compliance and best practice.

In the unlikely event of an environmental issue, senior management will be personally involved in the full investigation and solution.

We will endeavour to ensure that everyone involved with Bri-Tek Technologies Limited, including employees, supply chain and contractors will work towards the aims of this policy.

Signed

A handwritten signature in black ink, appearing to read "Mohamed Hanslod". The signature is fluid and cursive, with a long horizontal stroke at the end.
