

BRI-TEK TECHNOLOGIES HEALTH & SAFETY POLICY

It is the policy of Bri-Tek Technologies Limited to comply with the terms of the Health and Safety at Work Act 1974, and subsequent legislation, and to provide and maintain a healthy and safe working environment. The company is committed to the prevention of injury and ill health and continual improvement in health and safety performance. Bri-Tek Technologies Limited's health and safety objective is to minimise the number of instances of occupational accidents and illnesses and ultimately to achieve an accident-free workplace.

All employees will be provided with such equipment, information, training and supervision as necessary to implement the policy and achieve the stated objective.

Bri-Tek Technologies Limited recognise and accept their duty to protect the health and safety of all visitors to the company, including contractors and temporary workers, as well as any members of the public who might be affected by our operations. While the management of Bri-Tek Technologies Limited will do all that is within its powers to ensure the Occupational Health and Safety of its employees, it is recognised that health and safety at work is the responsibility of each and every individual associated with the company. It is the duty of each employee to take reasonable care of their own and other people's welfare and to report any situation which may pose a threat to the well-being of any other person.

The management of Bri-Tek Technologies Limited will provide every employee with the training necessary to carry out their tasks safely, however, if an employee is unsure how to perform a certain task or feels it would be dangerous to perform a specific job then it is the employee's duty to report this to their line manager.

An effective health and safety programme require continuous communication between workers. It is therefore every worker's responsibility to report immediately any situation which could jeopardise the well-being of himself or herself or any other person. All injuries, however small, sustained by a person at work must be reported to the Occupational Health and Safety Representative. Accident records are crucial to the effective monitoring and revision of the policy and must therefore be accurate and comprehensive.

Bri-Tek Technologies Limited Occupational Health & Safety Policy will be continually monitored and updated, particularly when changes in the scale and nature of our operations occur. The policy will be reviewed every 12 months unless changes in legislation dictate this happens sooner.
